**October 27, 2011**

*Time Change!* 2:00 PM - 3:00 PM

New York State Center of Excellence in Bioinformatics and Life Sciences  
701 Ellicott Street, Buffalo, NY 14203

## “Driving the High-Tech Economy in New York State”

**Featuring:**

**Patrick Foye**

*Deputy Secretary for Economic  
Development, Office of the Governor*

Under the leadership of Governor Cuomo, New York State has a new economic development vision and call to action to transform the State's economy.

NY has a long history as a research and technology innovation powerhouse. The Governor's announcement late last month of \$4.4B of private investment from Intel, IBM, TSMC, Samsung and Global Foundries without a dollar of taxpayer subsidy represents a new paradigm of economic development. The goal is to leverage the State's assets to drive the 21st century economy through business growth in nanotechnology, life sciences, energy, and other cutting edge sectors. Regional Economic Development Councils are engaging communities across the State in this effort.
